

Renewable Variability in Action — 24-Hour Dispatch Zoom on Archetypal Belgian Days (2025)

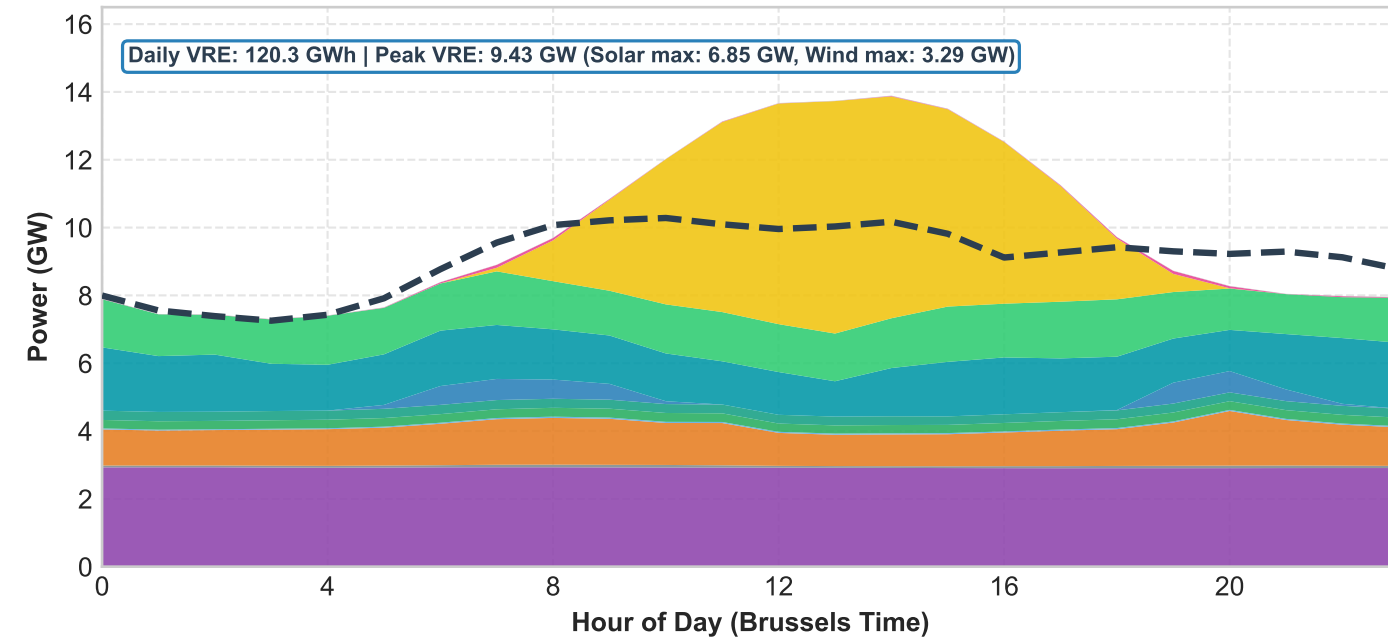

Winter Dunkelflaute (19 Jan 2025)

Severe VRE Deficit: Wind & Solar near zero; heavy reliance on Gas, Nuclear & Imports

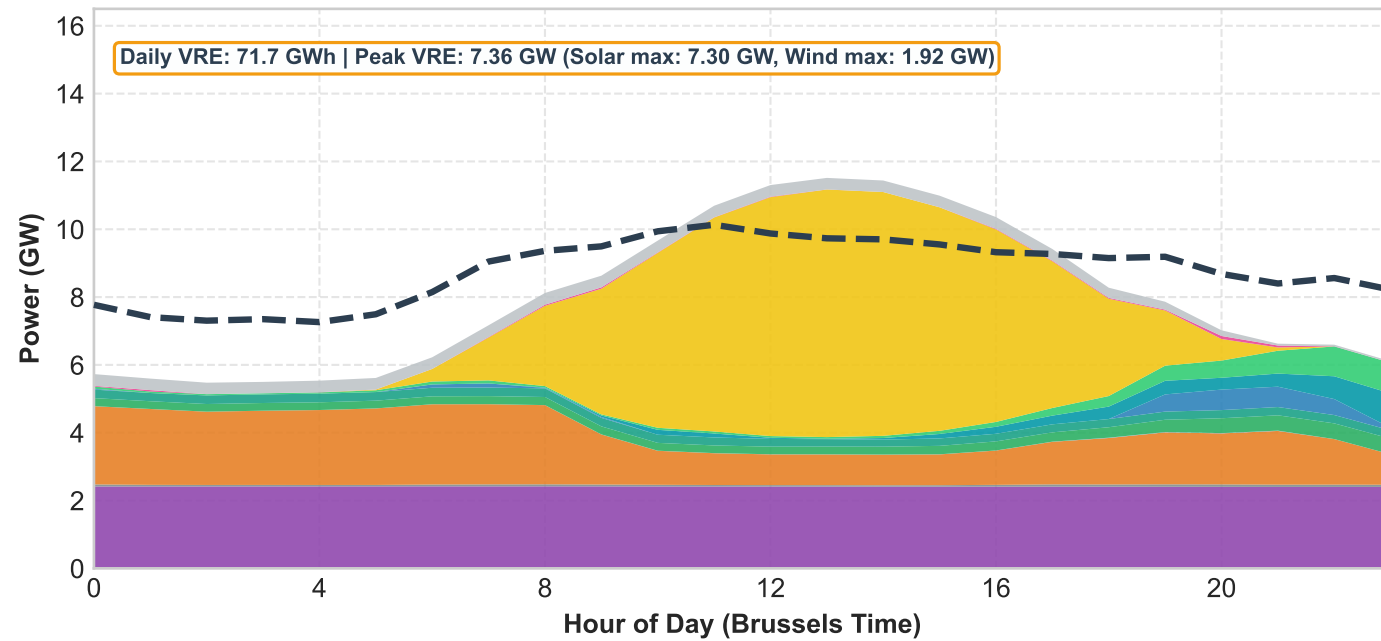

Spring High-VRE & Duck Curve (02 Apr 2025)

Steep solar ramp; VRE reaches 9.4 GW peak at midday, exceeding base demand

Summer Solar Peak (11 Jun 2025)

Record solar day: 7.3 GW midday peak covering ~70% of national load

Winter Wind Storm (24 Dec 2025)

High sustained wind: ~4.9 GW (onshore + offshore) round the clock
